The goal, she explained in 2013, was to "change the way we fund the publishing of quality content" for book-length publications, and in a way that would allow them to be made open access.

One common criticism of the open access and open science movements is that they tend to take a standardised view of science and scholarship, and so propose one-size-fits-all approaches when advocating for ways of making research and the research process more open and transparent.
