The short answer is yes, you absolutely can bet on zero in roulette. However, this decision ultimately lies with the player.

The odds of winning a bet on 0 on an American wheel are worse when compared to a European wheel.

That is one of the highest possible payouts in roulette.

However, like anything that has the potential to offer payouts, the odds of you

hitting the zero are stacked against you.

However, it \$\#39\$; s important to note that the odds of winning on either 0 or 00 o n an American roulette wheel are worse than the odds of winning on a European ro ulette wheel.

That means the expected value of betting £1 on either 0 or 00 on an America n roulette wheel is -£0.

However, it's important to keep in mind that the odds against you winning a re higher on an American roulette wheel compared to a European roulette wheel. We will examine the features, offerings, and reputations of these two high-rank
