To understand how odds are calculated, it's best to learn what they specify.

Understanding plus (+) and minus (-) odds is the most important thing before learning about American odds.

Plus and Minus Odds

If you bet the Cowboys -7 and they win by more than seven points, you win your bet.

“

If you bet \$100 on the Eagles to win at -150, you would net a payout of \$166.

In this case where both teams have a “+” in front of their odds, the

team with the lower number is the favorite.

Decimal Odds (British)

The team with the higher of the two numbers is the underdog and the team with the

lower of the numbers is the favorite.

We can hear you ask what the 1X2 mean.

20.

If you were to bet a \$10 stake on Liverpool to win then your returns are calculated as below:

Why? Well, for starters, it's one of the more old fashioned approaches to placing a bet in terms of “I bet team A will win the game” but beyond that it's a market that appeals hugely to more experienced bettors and professional punters alike.

Where we reference analysis, it's perhaps wise to think of this as research

.An example

Let's take the Southampton versus Liverpool example again.

So far this season, Southampton have played eight league games at St Mary's.
