Make The Best Bets Today With Our Picks & Predictions

With the OddsTrader BetStation, we wanted to create a site and app that will offer a wide range of leagues with data-driven predictions and betting advice to help you make informed, profitable picks and save you valuable time in the process.

There is always a percent chance of the computer pick being wrong, but in using historical data that measures past matchups of teams with similar statistics, and with taking things like injuries and weather into account, we should improve your chance of victory over time by using these picks.

No matter if it is football season or the summer, we have picks for the biggest games, including player props with a handy comparison of the best sportsbook prices for the players you want to bet on.

Frequent game bettors may be able to pick up on certain betting trends on teams, but there are dozens of teams to follow at once.

That is why using computer picks can be very useful as they will dramatically cut down your research time and crunch all the pertinent data to create predictions based on historical trends, how teams match up to one another, and the impact of injuries.

Frequent sports game bettors may consider paying for expert picks, but you must take caution in giving money to any so-called "tout" or gambling service online because some have been guilty of fraudulent behavior and ripping off customers.

With a growing number of legal sportsbook options available to the public, you will find plenty of competitive odds across the various leagues and betting markets.
